

The subject of design

Beauty and wellness coexist in what is one of the most extraordinary creations by Jacuzzi® produced in limited edition. The unprecedented combination of teak, glass, steel and techstone® has created a shower which is like moving to another dimension. Whatever you are looking for, by entering the Omega steam and shower cabin you will find it, you can relax, invigorate yourself, receive a boost of energy, release tension, wash away the tiredness.

The most beneficial of experiences

The Jacuzzi® vertical and back hydromassage involves the body throughout its entire height, stimulating all the muscle groups thanks to four directable Enerjet vertical jets. The steam generator allows you to get maximum performance from the steam bath that completes the shower moment with its purifying effect to which it is possible to combine the benefits of aromatherapy.

All the excitement of wellness

Omega allows you to choose three shower functions on the electronic control panel: pulsating, continuous and vaporised, all can be modulated in intensity according to the needs of the moment. In addition, by activating the cascade it is possible to receive a relaxing massage in the upper part of the neck and trunk. The shower cabin is available with either the seat on the right or with the seat on the left of the control panel and the shower.

Prestige in all the senses

Each shower is numbered and bears the signature of Pininfarina. The sinuous line of the seat is in perfect harmony with the innovative aesthetic lines of Omega which accommodates the body, making the shower a moment of complete comfort. The details are carefully researched, from the thermostatic mixer to the Crystal Clear treatment, to the function diverter: everything is the result of careful thought aimed at offering the most complete experience that you can have in a steam and shower cabin.
