

PREMIUM

PREMIUM sauna, hemlock external cladding, towel rail, clothes hooks and window panel.

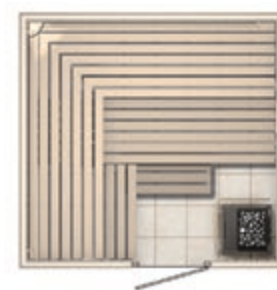

PREMIUM

Sauna PREMIUM: hemlock internal cladding, SANARIUM® heater MAJUS, SUNSET indirect lighting.

As far as the KLAFS PREMIUM sauna is concerned, “premium” represents the individual sense of style of its owner as well as denoting the particularly high quality of the sauna cabin itself. This model offers such attractive and useful details such as ergonomically formed head and back rests, cover panels between the benches and a stool to enable easy access on to the sauna benches. The interior walls are panelled in Scandinavian spruce or, on request, in Canadian hemlock. The control unit 18028 and the PLURIS sauna heater (both VDE

tested) work together with the KLAFS exhaust air system to provide the ideal climate. The PREMIUM Sauna achieves a truly authentic effect when combined with our SANARIUM with SaunaPUR®, which is also available as the BONATHERM VS under-bench system. 100 kg of olivine stones combine with the SaunaPUR® function to offer you an unbelievably pleasant and relaxing sauna bath. Or simply choose another form of bathing. Whether you opt for an aroma or tropical bath, you will feel totally refreshed.

Sauna PREMIUM: hemlock internal cladding, design package, BONATHERM VS SANARIUM®.

OLYMP lamp.

DUET beechwood and aluminium door handle.

Something for every kind of personality. The PREMIUM, though creating an impressive initial impact, can be taken a step further with the optional PREMIUM design package: a concealed joint pitched roof lends the cabin additional height and makes the internal area appear even more generously proportioned. Special corner strips for the wall and ceiling joint and the mitred upper corner bench ensure a smooth appearance. The package also includes the strik-

ing DUET door handle in beech and aluminium, the OLYMP lamp and the DELUXE hourglass. A collection of small but sophisticated features to bring your sauna into another class.

PREMIUM

The outstanding adaptability of the KLAFS PREMIUM sauna is apparent from the very first glance. The right size is available for every room, whether you choose the four- or five-cornered model, opt for the circular floor plan or wish to install your sauna in a corner of the room, under a sloping roof or in the cellar. The KLAFS PREMIUM sauna will blend in with whichever room you select and highlight the existing style of furnishing whilst still managing to shine aesthetically in its own right. The large selection of external cladding varieties enables you to align the whole appearance of the sauna perfectly to your individual taste.

Classical SOFTLINE profiled woods in natural or white varnished Scandinavian spruce or in Canadian hemlock are available. The elegant panel cladding varieties we supply offer you a choice between genuine hemlock, oak, walnut, wenge or maple veneer or white high-gloss varnish. There is also a choice of door heights, wide or narrow window elements and glass fronts. And the wide range of additional elements available on request, such as clothes storage shelves, mirror elements and towel hooks, will enable you to stamp an even more individual design on this sauna.
