

LIGHTING

Task lighting is an essential part of today’s healthy and productive work environments. Users appreciate control over personal lighting that allows them to position it where they need it and to adjust it to their various tasks. Steelcase lighting solutions include the industry-leading dash LED Task Light—engineered to reduce eyestrain—as well as innovative lighting options designed to support individual workers’ needs and complement both new and existing environments.

DASH TASK LIGHT
Featuring clean lines, fluid movement and a timeless aesthetic, the dash and dash mini LED Task Lights provide optimal lighting in nearly every environment. Yielding a soft, consistent pool of light that “falls off” considerably less than that of other LED lamps, dash and dash mini are as much about improving how we work as they are about making a subtle statement with their design.

DASH MINI TASK LIGHT
The smaller of the two dash LED task lights, dash mini has a compact design that maximises space and delivers optimal light. Also available with an integrated occupancy sensor for additional energy savings.

1+1™ LED PERSONAL TASK LIGHT
Completely illuminates the user’s active work zone and features a dimmer for perfect personal adjustment.

1+1 LED STANDARD TASK LIGHT AND 1+1 LED EXTENDED TASK LIGHT
Part of the 1+1 family of worktools, these task lights are the perfect companion for any work area—featuring a quiet aesthetic, 4-watt LED and minimal power consumption. The 1+1 LED Extended Task Light is designed for use on large worksurfaces, providing the user with an additional 20,32 centimeters of reach.
