

## INDIVIDUAL STEAM BATH

Individual installation solution in zebrano and glass.

Sauna, steam bath and circular shower with walnut front.

Everyone has their own ideas on what constitutes the best form of steam bath, ideas which we love to realise. All our steam baths, whether acrylic, ceramic or natural stone, can be adapted in line with your individual wishes. Our experienced experts will provide you with technical and practical support in all of your decisions. They will be happy to explain to you the magical atmosphere which can be generated by lighted mouldings, the STARRY SKY or decorative precious stones. Or why the high humidity and comparatively low temperatures of

43 – 46 °C are particularly healthy in instances of rheumatic complaints or respiratory illnesses. Or that our solid construction steam baths are supplied on request with heated flooring and benches and that the steam can also be infused with the aromas of passion fruit or mango. And they will also be able to explain to you how the sophisticated technology ensures an optimum climate and how the damp heat in its turn creates lovely skin. Simply pay us a visit in one of our showrooms. And bring your ideal relaxation a whole lot closer.
