

# EMPIRE

EMPIRE sauna with hemlock design package.

## EMPIRE

For the most discerning of requirements: the KLAFS EMPIRE sauna demonstrates the benefits of solid wood construction in impressive fashion. The solid timber will spoil you, bringing an air of Finnish authenticity to your home with its aesthetic lines and generous proportions. It is available in a variety of sizes and layouts, making it suitable for virtually any room. Whether you opt for the four- or five-cornered model, or order attractive extras for the cabin, the EMPIRE always makes a stylish statement, and is available in two different

woods. The version constructed entirely of Karelian spruce offers a particularly natural look, while Canadian hemlock offers an elegant, smooth appearance. Both these woods are extremely durable, meaning you will enjoy your EMPIRE for decades to come. In the interior, the stylish mouldings and cosy light generated by the LUMA sauna lamp exude an authentic sauna feeling. Meanwhile, the SOFT-CLIMA heater PLURIS has a 30 kg olivine stone capacity and produces a gentle radiant heat. For an original Finnish sauna bathing experience, whenever you please.

## EMPIRE

EMPIRE sauna with hemlock design package.

The interior design package of the EMPIRE also offers a whole range of special features to meet every requirement in terms of aesthetics and comfort: a flattering pitched roof and corner supports and mitre cut sauna benches with elegant back and head rests. The superior appearance of this solid wood sauna is set off by lovingly created details such as the lattice window and the graduated ceiling decoration. When it

comes to the technical side of things, the EMPIRE will also fulfil every heart's desire – regardless of whether you choose the PLURIS sauna heater or opt straightaway for our MAJUS heater, the intelligent control 18029 unit (both VDE tested) and the CIRCOTHERM exhaust air system. Extra elements, such as the SANARIUM with SaunaPUR® (from page 6) or SANO2 for optimum oxygen supply, will also help make your sauna bath a more intensive experience.

Fitted above the heater: stainless-steel sauna lamp.
