

PROTEO

PROTEO design sauna.

The KLAFS PROTEO serves as a permanent reminder of how fantastic taking a sauna can be. Even from the outside, the glass door and large window provide a foretaste of the pleasures in store for you inside. Translucent shelf doors in orange or green also serve to underline the “open” impression made by this design sauna. The combination of this and its stylistic elements has given it a presence in various design books. Your creative contribution to the process is to choose between aspen wood, hemlock or zebrano veneer for the external cladding and to make your selection from the various glass and mirror panels.

PROTEO

The “open” design of the PROTEO makes a whole range of delightful interior details visible from the outside. The heater corner in natural stone features the large MAJUS. The extra wide benches extending as far as the back rests. The OLYMP lamp, and, as if all this were not enough, the model can be upgraded with further extras and design elements. Whether you opt for BELLAVEDA, the SANARIUM with SaunaPUR® or the STARRY SKY, we can offer the ideal choice for relaxation, health and your aesthetic perception.

PROTEO design sauna with STARRY SKY ARKTIK.
