Area Pro comes naturally

Just as the best design objects offer an intuitive understanding of how to use them, the Area Pro series also comes naturally. With its earthy colors and pleasant tactility, the wide range of ceramic products offered by Area Pro immediately spurs ideas on how to use them. The Area Pro series, which is inspired by fine-grained, layered limestone, blends in and stands out. This

makes these tiles and accessories reliable go-to products in nearly every circumstance. Even if they are still new, they emanate their potential to become a future classic. In that sense, Area Pro's tiles can be seen as the ceramic equivalents of little black dresses and white shirts. Like these fashion mainstays, the range offers an impeccable look in every setting of work, home or leisure. All tiles are non-directional, which adds to their versatility, along with their diversity of formats and tones. Moreover, all colors in the new series are coordinated with AGROB BUCHTAL's ChromaPlural range, allowing for all kinds of mixes and matches. What's more, it always remains possible to create bespoke projects as well.

Grid

To live up to one's own standards, i.e. to combine high functionality with sophisticated design, AGROB BUCHTAL engaged the design shooting star Sebastian Herkner, who normally works for brands such as Thonet, Ligne Roset or Moroso. He created a completely new design for the surface of the highest slip-resistance class. The result: "the Grid".

Smart features

Always perfect grip

Area Pro offers multiple slip-resistant surfaces, including the Grid, which comes with a non-slip grade of R12V4.

Sustainably thin wall tiles

In the case of the 6 mm thin wall tiles, less material is required. Less material means less energy at production and transport as well as a lower weight.

Innovation DryTile

The DryTile option is available for floor tiles of the Area Pro series, for most sizes between 30 x 60 cm and 60 x 120 cm. DryTile is an innovative technology where a cork compound is applied on the back of the tiles. Thanks to this compound, tiles can be laid directly on an even surface, without the use of any glue.

Hytect hygienic surface

Area Pro tiles come with AGROB BUCHTAL's sustainable Hytect technology which make them easy to clean. Dirt and spills are easily removed from these tiles. Hytect protects ceramics from bacteria and mould, and neutralizes pollutants and odours.

Washbasins and shower trays

Area Pro comprises a collection of ceramic washbasins and shower trays which are available in all twelve colors of the series.

Ceramic channel cover

For tiles laid around the pool in swimming baths, AGROB BUCHTAL offers the appropriate termination which ensures visual continuity: a channel cover with water-cut openings.

Healthy building and living with Hytect-coated tiles

As we are spending 90 % of our lifetime in rooms (source: Sentinel Haus Institut 2014), it is important to be able to rely on a healthy living environment. The major part of the AGROB BUCHTAL product range is provided with the Hytect coating and thus makes an essential contribution to healthy living.

- Hytect inhibits the growth of fungi, bacteria and other microorganisms
- Hytect makes the cleaning of the surface easier
- Hytect helps to decompose air pollutants such as formaldehyde and odours in interior rooms

And all that solely thanks to the effect of light!

The obligation with regard to energy-efficient building has led to an increasing tightness of the building shells in the last years, so that it is more difficult for odours and pollutants to get outside than in the past. Therefore, it is important at the planning and execution of interior rooms to avoid substances harmful to health and to make an intelligent choice of the materials used in the interior. However, not only the building materials themselves may contribute to the pollution of the indoor air. Floor coverings, laying materials and furniture can also cause increasing concentrations of volatile organic compounds (VOC) in hermetically sealed buildings. With Hytect, architects and planners counteract these secondary effects.
