

## CHALET

CHALET sauna: External cladding in Swiss stone pine, glass front and 18033 control panel.

## CHALET

Stylish and cosy: this design sauna's contemporary interpretation of the chalet style strikes a perfect balance of the traditional and the modern. The first allusion to Alpine charms comes with the choice of material: the vividly delineated Swiss stone pine features an attractive contrast between spacious surfaces and clear lines. A suspended ceiling and decorative elements on the wall confer traditional touches, while the bench furnish-

ings exude purist elegance, thus creating a balanced overall impression. However, the accomplished design is not the only impressive feature of the CHALET sauna: for centuries Swiss stone pinewood has been regarded as conducive to good health and well-being. So why not find out for yourself? We're sure you won't regret it.

CHALET sauna: Swiss stone pine internal cladding plus decorative wall elements and SUNSET L indirect lighting.

CHALET sauna: SANARIUM® heater MAJUS and glass front with Swiss stone pine interior door handle.
