

HOME

A perfect introduction to the world of the sauna: The stable construction and the harmonious design of the KLAFS HOME sauna, one of the most reasonably priced RAL tested saunas on the market, is a real eye catcher. The high-quality fittings which come as standard and the extensive range of accessories are a captivating adjunct to the high level of quality. You are free to vary

the size of the sauna in 10 cm stages and have the choice of natural spruce, white varnished or hemlock external cladding. The additional details such as the mirror, the window, the towel rail and the hooks all go to make this a sauna a real hit as far as your budget is concerned – also suitable for self-assembly for keen DIY-ers.

HOME sauna, external cladding hemlock, towel rail.

HOME

Casting a glance around the interior of a HOME, the first thing to meet your eye will be the high-quality internal cladding, fully fitted in Scandinavian spruce or hemlock to provide a particularly pleasant bathing climate. There is a range of further details to lend weight to this favourable initial impression: ergonomic backrests, rounded mouldings and the LUMA sauna lamp are all a sight for sore eyes. A mere glance at the wide benches with their back and head rests is enough to imagine the comfort of actually lying on them. Hidden from view, on the other hand, is the espe-

cially large 30 kg olivine stone capacity of the PLURIS sauna heater, featuring solid wood protectors and certified by the German Association for Electrical, Electronic & Information Technologies (VDE). But you can feel it. The heater is easy to regulate using the 18028 control unit and always delivers the optimum sauna climate. The only thing which could make your life more pleasant would be to opt for the extra features of the SANARIUM with SaunaPUR® or a SOFTCLIMA. The accessories package, comprising a thermometer, an hourglass and the brochure "Everything about sauna bathing" rounds off the HOME sauna fittings.

Sauna HOME: internal cladding in hemlock, SOFTCLIMA heater PLURIS.
