

## STEAM BATH HOMBRE

HOMBRE steam bath, white tiled.

Our solid construction steam baths offer a particular temptation to surround yourself with beautiful warm steam vapours. These steam baths are fully clad in high-quality materials and are adaptable to your requirements and installation situations in a wide variety of ways. The HOMBRE model, for example, offers a range of floor plans and is fitted out with elegant stoneware. The HOMBRE is upgradeable

with further beautiful, practical and comfortable extras in the form of the magnificent STARRY SKY, an automated aroma system and the innovative control unit TOUCHCONTROL. The "steam blast" can also bring extra variety to your bathing programme. At the push of a button, air jets will blast the rising steam from the ceiling back onto your body in a similar way to intensive raponsing in the sauna.
